

## FUTA Credit Reductions

The standard FUTA rate is 6.0% on the first \$7,000.00 of wages. Employers in most states will receive a credit of 5.4% against the rate, resulting in net tax rate of 0.6%.

Some states/territories had loans with the Federal Unemployment Trust Fund that were still outstanding. Employers in these states will have their FUTA credit amounts reduced for 2022 to recover these funds.

### Important

The FUTA credit reduction is retroactive to first quarter 2022. Employers in these states may have much larger fourth quarter FUTA payments than expected.

Paychex will include the credit reductions when calculating fourth quarter FUTA liability and report it correctly on Form 940.

The following lists the impacted jurisdictions and their FUTA information and net FUTA rate:

Jurisdiction	Credit Reduction Percentage	Maximum Tax Increase Per Employee	2022 Net FUTA Rate
California	0.3%	\$21.00	0.9%
Connecticut	0.3%	\$21.00	0.9%
Illinois	0.3%	\$21.00	0.9%
New York	0.3%	\$21.00	0.9%
Virgin Islands	3.6%	\$252.00	4.2%

### Example:

A New York employer has 15 employees who all reached their FUTA wage base of \$7,000 in the first, second, or third quarter 2022. The employer has paid a total of \$630.00 in FUTA liability and doesn't expect to have a FUTA payment in fourth quarter.

The FUTA credit reduction is retroactive and requires the employer to pay an additional 0.3% on FUTA taxable wages for 2022. As a result, the employer needs to pay an additional \$21.00 per employee. FUTA liability in fourth quarter is \$315.00.
